

Dear ACS National Navigation Roundtable Member,
Sharing two (2) survey requests for your participation:

First Survey *(please complete on or before October 21, 2022):*

The American College of Surgeons/Commission on Cancer recently approved a new quality metric for head and neck cancer: time to initiation of postoperative radiation therapy. We are interested in understanding the present and future role of navigators in helping cancer centers meet their goal for this quality metric.

To that end, we designed this survey to assess:

- (1) the current landscape of navigation for patients with head and neck cancer through the treatment continuum; and
- (2) barriers and facilitators to enhancing navigation through postoperative radiation therapy for patients with head and neck cancer.

Please forward this link to the person who is most knowledgeable about navigation services provided for patients with head and neck cancer at your organization/health system. This person may be a navigator or navigator supervisor.

If there is someone in another organization who you think would be a valuable contributor to the survey, please feel free to forward this link to them as well.

Thank you for your engagement on this topic!

Elizabeth Calhoun, PhD, MEd

Electra Paskett, PhD

Co-Chairs NNRT Evidence Base Task Group

Second Survey *(please complete on or before September 30, 2022, 2022):*

The Foundation For Learning, Academy of Oncology Nurse & Patient Navigators have two (2) validation survey requests.

Your help is needed! Included below are links to 2 validation surveys. The ask is for all patient navigators, clinical navigators, and navigation leaders to complete the one survey that best represents their line of work.

Why?

These surveys are important because they allow you to review and provide feedback on the recently recommended certification exam content outlines. This in turn helps us ensure the AONN+ certification exams represent expertise in oncology patient and clinical navigation. The survey should take less than 20 minutes and the deadline to participate is September 30, 2022.

[Begin Clinical Navigator Survey](#)

[Begin Patient Navigator Survey](#)

You don't need to be an AONN+ member to take this survey, so please feel free to share these links with your navigation colleagues and leadership. The more feedback received, the better for the certification exams will be—so please take the survey today!

On behalf of the AONN+ FFL team, thank you in advance for your time, thoughtfulness, and participation in this survey.

The AONN+ FFL Team
